

OD-75 TyMate

1.5x Clip-on, Lighted Visor Magnifier

The Carson TyMate will turn any brimmed cap into a hands-free 1.5x power lighted magnifier. Its crystal-clear acrylic lenses give you a sharp distortion-free view to allow you to see even the finest details with ease. Super bright LED lights allow for easy viewing even in low-light conditions. Folds easily into its built-in protective case for compact storage.

- Perfect for fly-fishing
- Ideal for any outdoor activity where hands-free magnification is needed
- Great for model building, crafts, and map reading
- Super bright LED lights for low-light viewing
- Built-in protective case

**Directions:**

Squeeze clamp to open protective case and carefully extend the magnifier. Unfold each lens into viewing position. Squeeze clamp to attach the TyMate to the brim of your cap. Position lenses to the desired viewing distance using the adjustable arms and sliding track. Slide forward switch to illuminate the subject. Carefully refold lenses into protective case when not in use.

Uses (3) GP-395 button-cell batteries (included).
